**RELM Successfully Completes Project 25 Compliance Assessment
For KNG Series Mobile and Portable Radios
- Proven Interoperability on P25 Infrastructure of Four Competitors -**

WEST MELBOURNE, FL, June 7, 2011 – RELM Wireless Corporation (NYSE Amex: RWC) announced today that its KNG Series mobile and portable radios are now Project 25 Compliance Assessment Program (P25 CAP)-validated on the infrastructure of four competitors, and have been included on the Responder Knowledge Base (RKB) website (WWW.RKB.US).

The P25 CAP is a voluntary program that allows P25 equipment suppliers to formally demonstrate their products' compliance with a select group of P25 requirements. The purpose of the program is to provide federal, state and local emergency response agencies with evidence that the communications equipment they are purchasing meets P25 standards for performance, conformance, and interoperability. The program is a result of legislation passed by the U.S. Congress to improve communication interoperability for first responders and is a partnership of the Department of Homeland Security's (DHS) Command, Control and Interoperability Division, the National Institute of Standards and Technology, radio equipment manufacturers, and the emergency response community.

To assist the emergency response community with selecting interoperable communications equipment, DHS provides the RKB website; an integrated, online source of information on products, standards, certifications, grants, and other equipment-related information. Manufacturers must submit a Supplier's Declaration of Compliance (SDoC) and Summary Test Report (STR) for inclusion on the site. These documents provide a means of verifying that federal grant dollars are being invested in standardized solutions and equipment that promotes interoperability. Information on RELM/BK Radio's KNG Series mobiles and portables is now available on the RKB site.

RELM's KNG Series portable radios are one of the highest specification radios available in a small light-weight package, and they are gaining favor among first-responders. RELM's KNG Series mobile radios provide industry leading features like full-color touch screen technology which improves the usability of the radio.

RELM President and CEO David Storey commented, “All radio system infrastructure equipment deployed today is provided by our competitors. Therefore, for our sales efforts to be effective, it is important for potential customers to understand that our products will work on their existing system. Publication of our KNG Series Products on the RKB website helps fulfill that objective; providing public safety users with independent and documented proof that RELM’s BK Radio KNG Series products function on the radio system infrastructure of competitors. Furthermore, we have demonstrated the leading performance of our world-class products in real-time on public safety communication systems in Florida, California, Alaska, Wyoming, Montana and West Virginia.”

About APCO Project 25 (P25)

APCO Project 25 (P25), which requires interoperability among compliant equipment regardless of the manufacturer, was established by the Association of Public-Safety Communications Officials and is approved by the U.S. Department of Homeland Security. The shift toward interoperability gained momentum as a result of significant communications failures during emergency events. RELM was one of the earliest manufacturers of P25-compliant products, and today remains a staunch supporter of the P25 standard.

About RELM Wireless Corporation

As an **American Manufacturer** for more than 60 years, RELM Wireless Corporation has produced high-specification two-way communications equipment of unsurpassed reliability and value for use by public safety professionals and government agencies, as well as radios for use in a wide range of commercial and industrial applications. Advances include a broad new line of leading digital two-way radios compliant with APCO Project 25 specifications. RELM’s products are manufactured and distributed worldwide under BK Radio and RELM brand names. The Company maintains its headquarters in West Melbourne, Florida and can be contacted through its web site at www.relm.com or directly at 1-800-821-2900. The Company’s common stock trades on the NYSE Amex market under the symbol “RWC”.

This press release contains certain forward-looking statements that are made pursuant to the “Safe Harbor” provisions of the Private Securities Litigation Reform Act Of 1995. These forward-looking statements concern the Company’s operations, economic performance and financial condition and are based largely on the Company’s beliefs and expectations. These statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Company, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors and risks include, among others, the following: risks relating to uncertain economic conditions in the United States; reliance on contract manufacturers; heavy reliance on sales to the U.S. Government; federal, state and local budget deficits and spending limitations; limitations in available radio spectrum for use by land mobile radios; general economic and business conditions; changes in customer preferences; competition; changes in technology; changes in business strategy; the debt and inventory levels of the Company; quality of management, business abilities and judgment of the Company’s personnel; and the availability, terms and deployment of capital. Certain of these factors and risks, as well as other risks and uncertainties, are stated in more detail in the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2010 and in the Company’s subsequent filings with the SEC. These forward-looking statements are made as of the date of this press release, and the Company assumes no obligation to update the forward-looking statements or to update the reasons why actual results could differ from those projected in the forward-looking statements.
